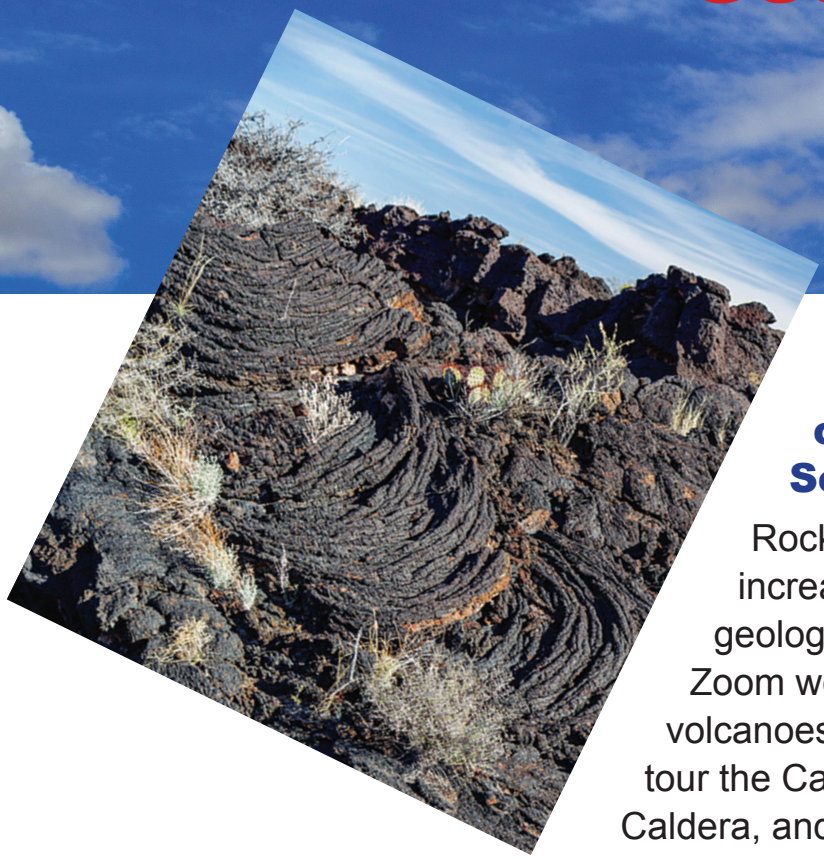
Rockin' Around New Mexico

Virtual Volcanoes & Seismicity Geology Workshop July 6–10, 2020

A 5-day (2 hours each day) geology workshop



(with optional graduate credit through the Masters in Science-ST 540 course)

Rockin' is for NM K–12 teachers interested in increasing their knowledge of geoscience and geologic hazards. This pre-recorded and live Zoom workshop will "virtually" take educators to volcanoes around New Mexico. Participants will tour the Carrizozo Volcanic Fields, the Valles Caldera, and other volcanoes in New Mexico. Teachers will also learn about the connection between volcanoes, ore formation, faulting, and seismicity—and the importance of preparing yourself and your classroom for earthquakes.

Resource materials and supplies included!

For information about taking S T-540 Rockin' Around New Mexico as part of the Master of Science for Teachers program at New Mexico Tech, call Megha Khandelwal at (575) 835-5470, megha.khandelwal@nmt.edu.

To register as professional development call Cynthia Connolly at (575) 835-5264, cynthia.connolly@nmt.edu. Professional development $40.00 supply fee is reimbursable for NM K–12 teachers.
