

The topographic map coverages follow the USGS naming convention using the degrees latitude and longitude starting at the lower right hand corner of the 1:250,000 that covers the 1:24000 quad. The 1:250,000 quad covers 2 degrees of longitude and is split into east and west sections for the naming convention. As an example, the Raton 1:250,000 has an east and west half; the 7.5 minute maps in the east half start with 36104, the west half start with 36105. The east and west halves have 8 map rows and 8 map columns. The columns are numbered 1-8 with 1 being the easternmost column; the rows are given letters, A-H and the A is the southernmost row. The following is a key for the 7.5 minute topographic maps used in this Arc project.

| | |
|------------------|----------|
| Casa Grande | 36104H8C |
| Casa Grande SW | 36104G8C |
| House Canyon | 36104F8c |
| Cimarron | 36104E8C |
| Vermejo Park | 36105H1C |
| VanBremmer Park | 36105G1C |
| Abreu Canyon | 36105F1C |
| Ute Park | 36105E1C |
| The Wall | 36105H2C |
| Ash Mountain | 36105G2C |
| Baldy Mountain | 36105F2C |
| Touch Me Not Mtn | 36105E2C |

All the metadata for these quadrangles is in the METADATA folder in text or Word format.

The metadata for the ColfaxHill coverage is the dem10meta.txt file in the METADATA folder.
