

EXPLANATION

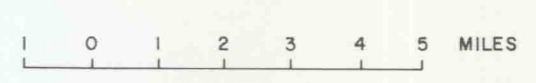

AQUIFERS
AQUIFERS are designated by all capital letters because that is the manner in which they are listed in table 3, which is a printout from a computer that cannot print lower-case letters.

Pleistocene to Holocene	QAL	Younger alluvium	QUATERNARY
	QAB	Older alluvium, terrace deposits, and caliche	
Pliocene	TO	Ogallala Formation	TERTIARY
	TRC	Chinle Formation	
Late Triassic	TRS	Santa Rosa Sandstone	TRIASSIC
	PAT	Artesia Formation	
Permian	PSA	San Andres Limestone	PERMIAN
	PG	Glorieta Sandstone	

Well Spring
Letter symbols indicate aquifer. Figures indicate specific conductance.

⊙ Circled symbol indicates chemical analysis is listed in table 3

□ Surface-water sample
Chemical analysis is listed in table 4

SPECIFIC CONDUCTANCE OF WATER IN DE BACA COUNTY, NEW MEXICO
