

ROCKIN' AROUND NEW MEXICO GEOLOGY WORKSHOP

SOCORRO, NEW MEXICO

JULY 5 - 7
2023

A Three-Day Geology Workshop for K-12 teachers

(with an optional graduate credit through the
NMT Master of Science for Teachers, DS - 5810)

Rockin' is a workshop for certified, NM K-12 teachers who are interested in increasing their understanding of geoscience. This workshop can be taken for professional development or for New Mexico Tech Master's in Science Teaching graduate credit. This year, we will be based out of Socorro, NM and our focus will be on landforms and hazards associated with the Rio Grande Rift. Participants will explore the geology of the Rio Grande Rift, faulting, rare earth elements, regional seismicity—and the importance of preparation for geology-related hazards. No previous geologic experience is necessary. Teachers should be able to walk one mile in arid conditions.

**SCHOLARSHIPS
AVAILABLE!**

For information about DS-5810 Rockin' Around New Mexico and the Master of Science for Teachers program at New Mexico Tech, contact Megha Khandelwal at (575) 835-5470 or megha.khandelwal@nmt.edu.

To register as professional development please fill out this form: <https://forms.gle/YKGCtcWTRXMHxaj26>.
If you have questions contact: Cynthia Connolly at (575) 835-5264, cynthia.connolly@nmt.edu.

**Reimbursement is available to New Mexico
teachers for travel and lodging.**
