INDEX TO SAMPLES FROM OIL AND GAS WELL TESTS

IN LIBRARY AT SOCORRO, NEW MEXICO

(January 1, 1958 to July 1, 1961)

Compiled by

Linda P. Blymn and Sharon L. Ballenger

Collection of samples from oil and gas well tests in New Mexico by the New Mexico Bureau of Mines and Mineral Resources was commenced shortly after its establishment in 1927. Through the years the collection has grown until, at present, samples from over 5,700 wells from all parts of New Mexico are included. Samples from cuttings and cores in the collection are indexed and readily available for study.

The collection provides a state-wide record of subsurface stratigraphy and is a permanent repository for this valuable geological material. Though only a small proportion of the field wells are represented at present, every effort has been made to secure samples from wildcat tests. New accessions are being made constantly as drilling progresses. The library will have increasing value as the search for liquid and gaseous fuels becomes more intensive.

This index, in which the wells are listed by section, township, and range, was prepared as a reference catalog for the benefit of those interested in the subsurface data of New Mexico. The present list covers samples processed between January 1, 1958 and July 1, 1961. For a list of samples processed before January 1, 1958, the reader is referred to:

Bieberman, Robert A., and Crespín, Florence B. (compilers)
(1955) Index to samples from oil and gas well tests in library at Socorro, New Mexico; N. Mex. Inst. Min. and Tech., State Bur. Mines and Mineral Res., Circ. 30.

Bieberman, Robert A., and Dawdle, M. M. (1958) Index to samples from oil and gas well tests in library at Socorro, New Mexico, 1955 through 1957; N. Mex. Inst. Min. and Tech., State Bur. Mines and Mineral Res., Circ. 45.

Facilities are provided in Socorro for examination and study of samples at any time by qualified individuals and organizations.
