The annual [New Mexico Mineral Symposium](#) provides a forum for both professionals and amateurs interested in mineralogy. The meeting allows all to share their cumulative knowledge of mineral occurrences and provides stimulus for mineralogical studies and new mineral discoveries. In addition, the informal atmosphere encourages intimate discussions among all interested in mineralogy and associated fields.

The Mineral Symposium is organized each year by the Mineral Museum at the New Mexico Bureau of Geology and Mineral Resources.

Abstracts from all prior symposiums are available: <https://geoinfo.nmt.edu/museum/minsymp/abstracts>

DIGITAL IDS IN ADOBE ACROBAT

You can create a digital ID that allows you to electronically sign PDF documents. This can save time and paper if you need to email a digital copy of a form to someone. Below is a procedure to create an ID using the free [Adobe Acrobat Reader DC](#). There are other possible workflows to create a digital ID and you may also want to refer to Adobe's [Digital IDs FAQ](#).

CREATE A NEW ID WHILE SIGNING A DOCUMENT

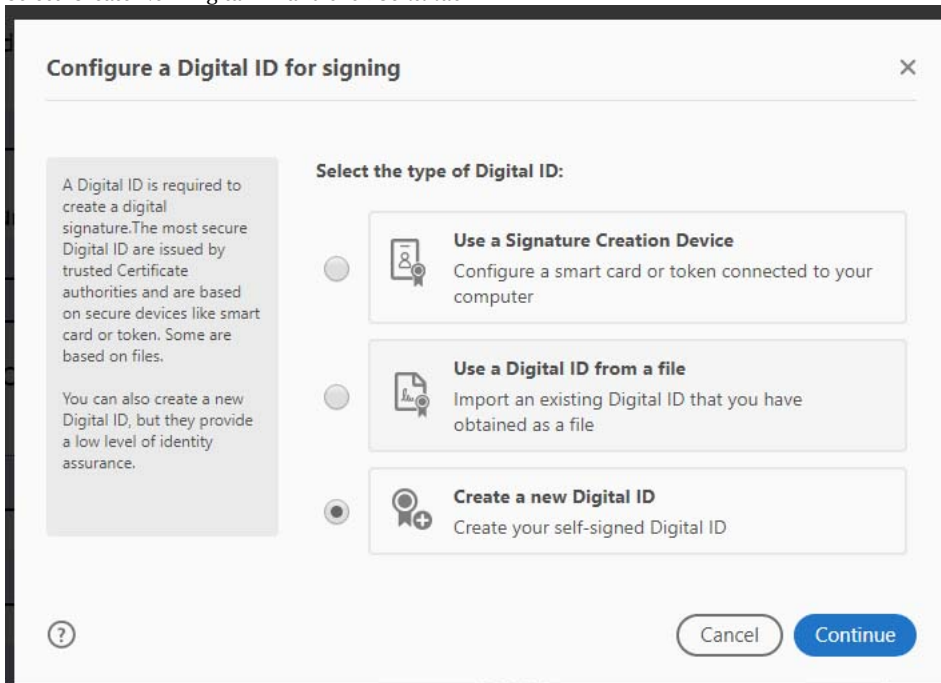

1. Open a PDF form with a signature field (like the [NMT Travel Form](#))
2. Click on the *signature field* where you wish to sign and click *Configure Digital ID* when prompted:

Request Approvals

NMT President (required for international travel)

3. Select 'Create New Digital ID' and click *Continue*

4. Select the 'Save to File' option and click *Continue*

Select the destination of the new Digital ID ×

Digital IDs are typically issued by trusted providers that assure the validity of the identity. Self-signed Digital ID may not provide the same level of assurance and may not be accepted in some use cases.

Consult with your recipients if this is an acceptable form of authentication.

Save to File

Save the Digital ID to a file in your computer

Save to Windows Certificate Store

Save the Digital ID to Windows Certificate Store to be shared with other applications

?

Back
Continue

5. Enter your contact information and click *Continue* (optionally, you could select 'Digital Signatures and encrypt files' option in the Use For box)

Create a self-signed Digital ID ×

Enter the identity information to be used for creating the self-signed Digital ID.

Digital IDs that are self-signed by individuals do not provide the assurance that the identity information is valid. For this reason they may not be accepted in some use cases.

Name	<input type="text" value="FirstName LastName"/>
Organizational Unit	<input type="text" value="NM Tech"/>
Organization Name	<input type="text" value="NM Bureau of Geology & Mineral Resources"/>
Email Address	<input type="text" value="FirstName.LastName@nmt.edu"/>
Country/Region	<input type="text" value="US - UNITED STATES"/>
Key Algorithm	<input type="text" value="2048-bit RSA"/>
Use Digital ID for	<input type="text" value="Digital Signatures"/>

?

Continue

6. Enter a strong password that you will remember and *Save*

The dialog box is titled "Save the self-signed Digital ID to a file" and has a close button (X) in the top right corner. On the left, there is a grey box with instructions: "Add a password to protect the private key of the Digital ID. You will need this password again to use the Digital ID for signing." and "Save the Digital ID file in a known location so that you can copy or backup it." To the right, it says "Your Digital ID will be saved at the following location :" followed by a text input field containing "C:\Users\adamread\Documents\Digital_ID\AdamRead.r" and a "Browse" button. Below this, there are two password fields: "Apply a password to protect the Digital ID:" and "Confirm the password:". At the bottom, there is a help icon (?), a "Back" button, and a "Save" button.

7. Check the new ID and Click *Continue*

The dialog box is titled "Sign with a Digital ID" and has a close button (X) in the top right corner. It prompts the user to "Choose the Digital ID that you want to use for signing:" with a "Refresh" button. A list of digital IDs is shown, with one selected: "FirstName LastName (Digital ID file)" with a "View Details" link. Below the list, it says "Issued by: FirstName LastName, Expires: 2022.09.11". At the bottom, there is a help icon (?), a "Configure New Digital ID" button, a "Cancel" button, and a "Continue" button.

8. If you want your digital ID to look like your handwritten signature, take a blank piece of white paper, place it over some ruled paper, and sign it (trying to stay between the lines). If your handwritten signature is too tall, it will look very small because the vertical space is limited.

9. Scan your signature, crop it (with tight margins), and save the image as a PDF.

10. Click *Image* and then *Browse* to your signature PDF

The dialog box is titled "Customize the Signature Appearance" and has a close button (X) in the top right corner. At the top, there are four tabs: "Text" (selected), "Draw", "Image", and "None". Below the tabs is a preview area showing the signature appearance: "<your common name here>" on the first line, "2017.09.08" on the second line, and "14:07:01 -06'00'" on the third line. Below the preview are two sections: "Include Text" and "Text Direction".

Include Text

- Name
- Distinguished Name
- Date
- Adobe Acrobat Version
- Location
- Logo
- Reason
- Labels

Text Direction

Auto [Left-to-Right] [Right-to-Left]

Digits format

0123456789

At the bottom, there is a "Preset name" field, a "Cancel" button, and a "Save" button.

11. You should uncheck the 'Labels' and 'Logo' options. You will probably want to leave the 'Name' and 'Date' options checked (you can change this later) and then click *Save*.

The dialog box is titled "Customize the Signature Appearance" and has a close button (X) in the top right corner. At the top, there are four tabs: "Text", "Draw", "Image" (selected), and "None". Below the tabs is a preview area showing the signature appearance: "FirstName LastName" in a handwritten font on the first line, "<your common name here>" on the second line, "2017.09.11" on the third line, and "10:12:19 -06'00'" on the fourth line. Below the preview are two sections: "Include Text" and "Text Direction".

Include Text

- Name
- Distinguished Name
- Date
- Adobe Acrobat Version
- Location
- Logo
- Reason
- Labels

Text Direction

Auto [Left-to-Right] [Right-to-Left]

Digits format

0123456789

At the bottom, there is a "Preset name" field containing "Created 2017.09.08 14:14:06 -06'00'", a "Cancel" button, and a "Save" button. There are also "Browse" and "Clear" buttons next to the preview area.

12. Your digital ID has been created, but you need to enter your password to use it:

Sign as "FirstName LastName" ×

Appearance Created 2017.09.08 14:14:06 -06'... ▼ Create Edit

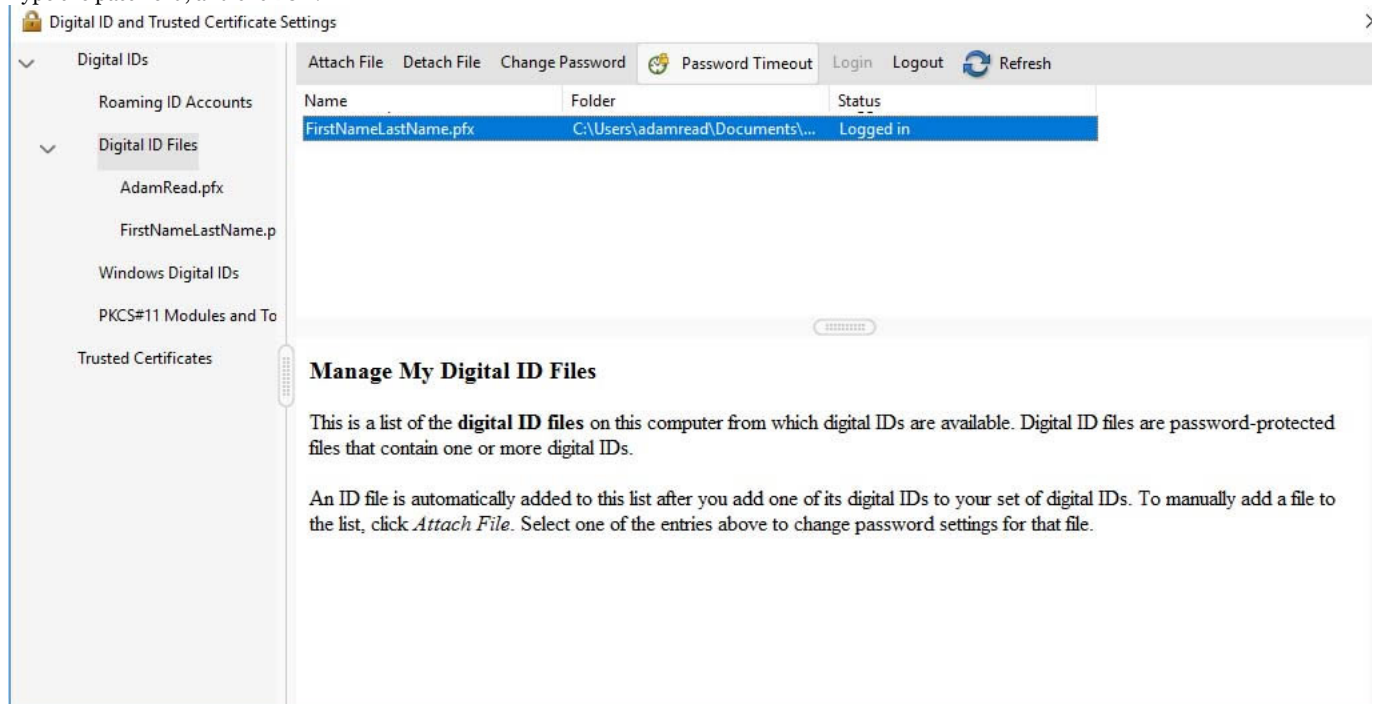

FirstName LastName
2017.09.11
10:13:23 -06'00'

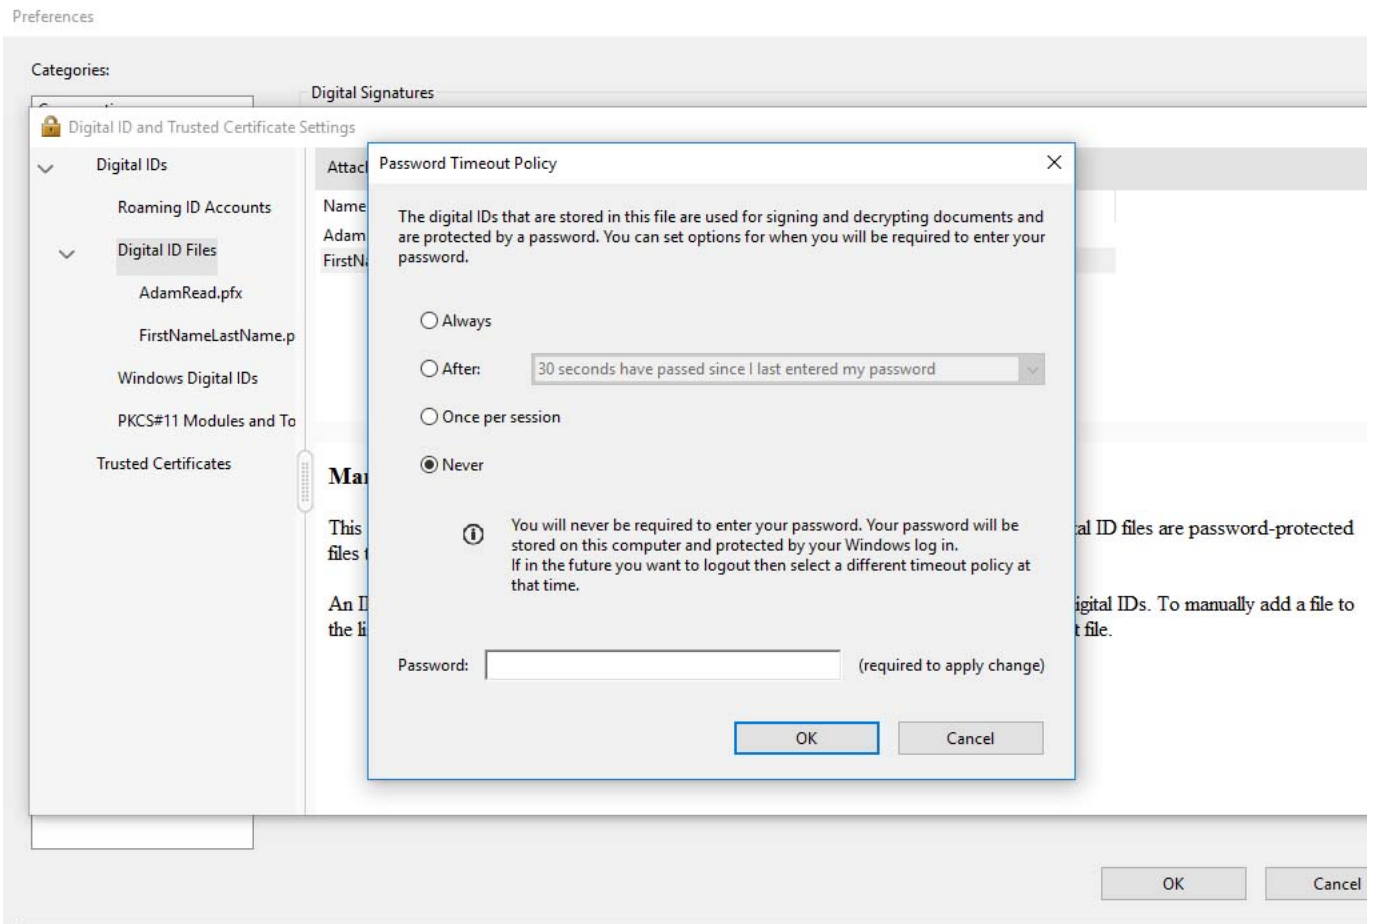

[View Certificate Details](#)

Enter the Digital ID PIN or Password... Back Sign

13. Optionally, you can set your ID up so that you are not to be required to enter a password every time you use it and to just rely on your OS login for security (adapted from the Acrobat [Digital IDs FAQ](#)):

- In Acrobat, click the Edit menu and choose Preferences > Signatures. In Identities & Trusted Certificates, and click More.
- Expand Digital IDs on the left, select Digital ID Files, and then select a digital ID on the right (see image below).
- Click Password Timeout (see image below).
- Specify how often you want to be prompted for a password:
 - Always - Prompts you each time you use the digital ID.
 - After - Lets you specify an interval. Once Per Session - Prompts you once each time you open Acrobat.
 - **Never - You're never prompted for a password.**
- Type the password, and click OK.

14. Once your ID is properly configured, you just need to select the ID you want to use when after you click on a signature field on a form. If you haven't set the password option to 'Never' as above, you will be prompted for a password. In any case, you will be asked to save the document after signing. If you want to, you can save the document using the original filename.
