ERRATA SHEET — GEOLOGIC MAP 37

In the lower left corner of GM-37, in sections 17 and 20, please reverse the arrows on the dotted line so that they identify the dotted line as a syncline (not an anticline, as printed).

Also, please disregard the inadvertent color streaks printed in sections 10 and 14, as shown above.

New Mexico Bureau of Mines and Mineral Resources  August 3, 1976
