**Legend**

- Area underlain by the Mission Formation (Jurassic) contains deposits in sediments formed in that formation.
- Area underlain by the Ojibwa Formation (Triassic) contains deposits in sediments formed in that formation.

**Notes**

- Data compiled from various sources:
  - U.S. Geological Survey
  - New Mexico Bureau of Mines and Mineral Resources
  - New Mexico Institute of Mining and Technology

- This map is intended to provide a general overview of uranium resources in New Mexico and should not be used for detailed mineral exploration.

- Additional information can be found in the original publication and related reports.
