New Mexico Energy, Minerals, and Natural Resources Department
Mining and Minerals Division
Mine Registration, Reporting and Safeguarding Program

The MRR&S Program administers mine, mill and smelter registration, annual operator reporting and safeguarding (Laws of New Mexico, 1989, Chapter 193 and 19 NMAC 7.1 and 7.2); serves as an information clearinghouse on mining, minerals and permitting for governmental agencies, industry, and the general public; maintains an industry and resource database on production, reserves, employment, and economics of the mining industry; and compiles and publishes annual industry statistics. The program also provides mineral policy and planning assistance to the division and department.

New Mexico Bureau of Geology and Mineral Resources
A Division of New Mexico Institute of Mining and Technology

The New Mexico Bureau of Geology and Mineral Resources is responsible for basic and applied research in all aspects of geology and mineral resources. The bureau is non-regulatory and its director is the State Geologist whose staff serves as the state geological survey. The bureau conducts studies and disseminates information on geology, mineral and energy resources, hydrology and groundwater, geologic hazards, environmental problems, and extractive metallurgy. These data are used by federal, state, and local agencies, other public organizations, private industry, and individual citizens.

New Mexico Bureau of Mine Inspection

The New Mexico Bureau of Mine Inspection provides education to miners in the health and safety aspects of mining. This office also investigates fatal accidents, issues permits for underground diesel-powered equipment, certifies mine foremen and supervisors, assists mine rescue teams and provides health and safety consultations to mine operators.
INTRODUCTION

The data on mining operations listed in this report were collected by the Mining and Minerals Division (MMD) of the New Mexico Energy, Minerals and Natural Resources Department (EMNRD) under the authority of NMSA, 1978, Chapter 69. Before the start of any mining operation, the operator must register the mine, mill, smelter, pit, quarry or other operation with MMD on a form provided by the Division. Other forms are provided for the required reporting of annual production, sales, and employment data. Permanent or temporary closures, reactivations, and safeguarding after operations cease must also be reported. Operators may contact EMNRD at (505) 476-3400 for a registration and reporting packet containing further information and forms or visit our website at http://www.emnrd.state.nm.us/mining.

This publication, for the first time, is organized by commodity type (e.g. industrial minerals) and by county thereunder. This is consistent with MMD’s regulatory requirements for annual reporting. The commodities listed for any particular operation are only those produced and reported during calendar year 1999, the latest year for which production data is available. Commodities produced by any operation, but particularly stone/aggregate and industrial minerals operations, can change significantly over time depending on many factors.

We hope that this list of mines and mills in New Mexico, and the indices and appendices, will be of help to the reader and to the mining industry. Please do not hesitate to transmit corrections and additions to any of the senior editors.

DISCLAIMER: The information in this document is from an MMD database developed through operator submittals to the Division. Some of the information may not be current. Keeping the Division informed of operational changes is the sole responsibility of the operator.

# Aggregate & Stone Mining

## Bernalillo County

### HATTIE MINE

- **Type of Operation**: Surface Mine
- **Status**: Active Mining
- **MSHA Number**: 2901328
- **Location**: Sec 18 T9N R6E
- **USGS Quad**: Sedillo
- **Mineral Estate**: Private Land; NM Brick Co., Inc.
- **Surface Estate**: Same

### OSUNA PIT

- **Type of Operation**: Surface Mine
- **Status**: Active Mining
- **MSHA Number**: 2900499
- **Location**: Sec 27 T11N R3E
- **USGS Quad**: Alameda
- **Mineral Estate**: Private Land; Steve Benoit; PO Box 6325, Albuquerque, NM 87197
- **Surface Estate**: Same

### SHAKESPEARE PIT

- **Type of Operation**: Surface Mine
- **Status**: Active Mining
- **MSHA Number**: 2900418
- **Location**: Sec 34 T11N R3E
- **USGS Quad**: Alameda
- **Mineral Estate**: Private; Sundt Corp., PO Box 26685, Tucson, AZ 85726
- **Surface Estate**: Same

### TIJERAS PLANT AND QUARRY

- **Type of Operation**: Other
- **Status**: Active Mining
- **MSHA Number**: 2902071
- **Location**: Sec 21 T4S R22E
- **USGS Quad**: Mesa
- **Mineral Estate**: Federal

## Chaves County

### 1-MESA

- **Type of Operation**: Sand & Gravel
- **Status**: Active Mining
- **MSHA Number**: 2900444
- **Location**: SW Sec 33 T9N R2E
- **USGS Quad**: Seven Springs
- **Mineral Estate**: Private Land; Raymond and Lucille Gutierrez; 1550 Barr Rd. SW, Albuquerque, NM 87105
- **Surface Estate**: Same

### 2

- **Type of Operation**: Gravel/Base Course
- **Status**: Active Mining
- **MSHA Number**: 2902032
- **Location**: SW/4 Sec 33 T10S R31E
- **USGS Quad**: Mescalero Point NE
- **Mineral Estate**: Private Land; Jack Luce; West Star Route NBV, Tatum, NM 88267
- **Surface Estate**: Same

### CHAVES COUNTY PIT

- **Type of Operation**: Crushed Rock/Sand/Top Soil/Base Course
- **Status**: Active Mining
- **MSHA Number**: 2900885
- **Location**: Sec 18 T11S R24E
- **USGS Quad**: Roswell South
- **Mineral Estate**: Private Land

### CITY OF ROSWELL PIT

- **Type of Operation**: Gravel/Top Soil/Crushed Rock/Base Course/Fill Dirt/Other
- **Status**: Active Mining
- **MSHA Number**: 2901519
- **Location**: Sec 29 T11S R24E
- **USGS Quad**: Roswell South

### CITY OF ROSWELL PIT

- **Type of Operation**: Other
- **Status**: Active Mining
- **MSHA Number**: 2900444
- **Location**: SW Sec 33 T9N R2E
- **USGS Quad**: Seven Springs
- **Mineral Estate**: Private Land; Raymond and Lucille Gutierrez; 1550 Barr Rd. SW, Albuquerque, NM 87105
- **Surface Estate**: Same

### OSUNA PIT

- **Type of Operation**: Surface Mine
- **Status**: Active Mining
- **MSHA Number**: 2900499
- **Location**: Sec 27 T11N R3E
- **USGS Quad**: Alameda
- **Mineral Estate**: Private Land; Steve Benoit; PO Box 6325, Albuquerque, NM 87197
- **Surface Estate**: Same

### SHAKESPEARE PIT

- **Type of Operation**: Surface Mine
- **Status**: Active Mining
- **MSHA Number**: 2900418
- **Location**: Sec 34 T11N R3E
- **USGS Quad**: Alameda
- **Mineral Estate**: Private; Sundt Corp., PO Box 26685, Tucson, AZ 85726
- **Surface Estate**: Same

### TIJERAS PLANT AND QUARRY

- **Type of Operation**: Other
- **Status**: Active Mining
- **MSHA Number**: 2902071
- **Location**: Sec 21 T4S R22E
- **USGS Quad**: Mesa
- **Mineral Estate**: Federal

### CHAVES COUNTY PIT

- **Type of Operation**: Crushed Rock/Sand/Top Soil/Base Course
- **Status**: Active Mining
- **MSHA Number**: 2900885
- **Location**: Sec 18 T11S R24E
- **USGS Quad**: Roswell South
- **Mineral Estate**: Private Land

### CITY OF ROSWELL PIT

- **Type of Operation**: Gravel/Top Soil/Crushed Rock/Base Course/Fill Dirt/Other
- **Status**: Active Mining
- **MSHA Number**: 2901519
- **Location**: Sec 29 T11S R24E
- **USGS Quad**: Roswell South

APPENDIX A

New Mexico’s Mineral Industry--An Overview
Compiled by the Mining and Minerals Division of the
New Mexico Energy, Minerals and Natural Resources Department

Data and statistics are compiled from information included in annual reports submitted to the department. Information from these reports is not compiled and available until late in the current year (2000) for the previous year (1999). Therefore, this report essentially represents a “snapshot” of state resources in December 1999, and is the most recent data available at the time of publication of this document.

Coal, copper and potash production are not only important to the state but also important to the country. New Mexico produces about 70 percent of all potash in the U.S. and consequently is the number one potash producer in the nation. The state ranks 12th in coal and 3rd in copper production in 1999.

Table 1 provides summary information on several attributes of mineral commodities produced in the state in 1999. Figures 1 through 4 are developed from Table 1 and show the importance of different mineral commodities to the state, and their relative importance to each other.

Because production in Table 1 is provided in different units (e.g. short tons, pounds) it is most useful to examine production value. Figure 1, showing production value, indicates that coal, copper and potash, in that order, are the top three in the state. These three commodities alone account for 80 percent of the total statewide production value of $1.45 billion. Coal itself accounts for 44 percent of the production value.

Figure 2, providing employment by commodity, reflects a similar trend; 75 percent of workers employed in the mining industry work in coal, copper or potash. Copper, with 33 percent of the total employees, is New Mexico’s largest mineral employer, followed by coal (26 percent) and potash (15 percent). Employment shown in Figure 2 and total payroll in Figure 3 reflect similar percentages.

Revenue generated on Figure 4 shows that coal overwhelms the others. Coal by itself generates 87 percent of the total revenue. Coal, in addition to copper and potash, generates 95 percent of the total.

Industrial minerals. Include perlite, pumice, gypsum, salt, mica, aggregates (crushed stone, sand and gravel), zeolite, calcite, both silica and chemical limestone flux, Portland cement, mineral dessicants, feldspar, clay, humate and semi-precious gemstones. The industrial minerals industry employed 731 workers in 1999, compared to 672 in 1998 and had a total payroll of $17.8 million. The industry produced 3.7 million st of materials from mines (2 million st) and mills (1.7 million st) compared to 3.3 million st of materials in 1998. Production value was $176.7 million.

Perlite. New Mexico led the nation in production of perlite; however, exact figures are withheld due to confidentiality. Active operations include: Dicaperl’s El Grande mine/mill and Socorro Perlite mine/mill, in Taos and Socorro Counties, respectively; Harborlite’s No Agua mine/mill in Taos County; and US Gypsum’s mine/mill in Cibola County. 118 employees were reported for the perlite industry, up four employees from 1998 with a yearly payroll of over $3.9 million, up from $3.8 million in 1998. Perlite is used chiefly in construction, filters, and agricultural applications.

Pumice. New Mexico is fourth in the U.S. in pumice production. Six operations were registered in 1999 including 2 each in Santa Fe, Rio Arriba and Sandoval counties. Employment at all operations was about 50 employees. Pumice is used in building blocks and by the clothing industry.

Humate. Humate mines/mills in 1999 include: U-Mate Mine in Sandoval County; Mesa Verde Resources Mill supplied by the Star Lake and Pueblo Alto Mines in McKinley County; Dirtwork’s Eagle Mesa Mine and Menefee Mining Corp. Mine/Mill. Employment at all operations was 10 direct employees and 1 contract.
Salt. Industry employment was 93 with a payroll over $2.4 million. Production value was over $10 million.

Stone and Aggregate. The aggregate and stone mining industry had 168 active mining operations in New Mexico during 1999, compared to 148 in 1998. Yearly industry payroll was almost $17 million, compared to 18.7 million in 1998. Aggregate resources produced include sand, gravel, base course, caliche, crushed rock, rip-rap, scoria, fill dirt, and top soil. Total combined production was 13.4 million st compared to 12.3 million st in 1998. Production was valued at $60.7 million compared to $50.2 in 1998. Crushed stone and base course account for nearly half of all production value. The industry employed 816 direct and 163 contract employees for a total of 979, down from 1084 employees in 1998.

Further Information: The above information is extracted from the publication "New Mexico’s Natural Resources", which contains a discussion of each of the state’s leading mineral commodities, in addition to its other resources. Single copies may be obtained at no cost by contacting the editor, John Pfeil, at the Mining and Minerals Division, 1220 S. St. Francis Drive, Santa Fe, NM 87505; by phone at (505) 476-3407; or by e-mail at jpfeil@state.nm.us. It can also be viewed on the department’s website at http://www.emnrd.state.nm.us. For additional information on mining and minerals in New Mexico go to the Mining and Minerals Division homepage at http://www.emnrd.state.nm.us/mining; or to the New Mexico Bureau of Geology and Mineral Resources website at http://geoinfo.nmt.edu.

7,021  
277,708,501  
39,516,043

¹ Production for coal, industrial minerals, aggregates, potash and sulfuric acid in short tons; copper, molybdenum, and uranium in pounds; gold and silver in troy ounces.

³ Category includes direct and contract employees; because gold, silver and sulfuric acid are primarily co-products of copper production employment numbers for these commodities are embedded in the copper number.

⁴ Revenue includes 50% state share of federal royalties and state royalties/rentals from state trust land mineral leases; and state severance, resources excise and, where applicable, energy conservation tax revenues.

Data from NM Tax and Revenue Department and the State Land Office.

⁵ Category includes gypsum, perlite, salt, limestone, calcite, dimension stone, silica flux, clay, humate, scoria, pumice, mica and zeolites.

⁶ Category includes base course, caliche, clay and shale, crushed rock, dimension flagstone, fill dirt, gravel, limestone, red dog, rip rap, sand, scoria, topsoil, travertine and other.

All Data from the Energy, Minerals and Natural Resources Department, Mining and Minerals Div. (unless otherwise noted).

- Aggregates: 3%
- Copper: 4%
- Coal: 87%
**APPENDIX B**

**Land Division by the Township and Range System**

Most land in the United States north and west of the Ohio River is divided into grids based on township, range, and section. In this publication areas of mining activity are located according to this system. The grids subdivide the land into blocks six miles to a side referred to as townships. Townships are referenced to principal meridians, which trend north-south, whereas ranges are located from baselines, which run east-west. New Mexico contains one range and one meridian that intersect near San Acacia and just east of I-25 in Socorro County.

Each township is further divided into 36 one-mile square sections. Section 1 is always located in the northeast corner of the township (Fig. 1). The location of a mine, mill or quarry within a township may be specified more rigorously by further subdivision of sections into quarter sections which are written as 4, not ¼ for ease of typing. For example, the mill shown in Figure 1 has a location of NW4 SW4 SE4 Sec. 24 T2S R2W. The land grid does not cover certain lands, such as Spanish Land Grants, Indian Reservations, or unsurveyed areas. When possible, a projected T and R description is provided.

APPENDIX C

Sources for State and Regional Maps of New Mexico

BUREAU OF LAND MANAGEMENT

New Mexico State Office
PO Box 27115
Santa Fe, NM 87502-0115
(505) 438-7400

Land use maps at 1:100,000. Minerals management maps at 1:100,000. "Color quad" series, land administration by section, 1:126,720.

Maps available for sale.

ENERGY, MINERALS, AND NATURAL RESOURCES DEPARTMENT
NEW MEXICO MINING AND MINERALS DIVISION

1220 S. St. Francis Drive
Santa Fe, NM 87505
(505) 476-3400

Coal mine permits showing geology, hydrology, vegetation, soils, land, and coal ownership. Not for sale; may be viewed in office. Parts may be copied. Scales vary.

NEW MEXICO BUREAU OF GEOLOGY AND MINERALS Resources

801 Leroy Place
Socorro, NM 87801
(505) 835-5410
http://geoinfo.nmt.edu/

USGS topographic maps at standard scales. 1983 state base map at 1:1,000,000. County road maps, hydrologic, geologic, and mining maps at various scales covering many parts of the state. Publications list available. Prices vary. Also handle New Mexico Geological Society maps, guidebooks, and publications.

NEW MEXICO STATE LAND OFFICE

310 Old Santa Fe Trail
PO Box 1148
Santa Fe, NM 87504
(505) 827-5760

Entire state by quadrangle and county. Township plats, trust lands, surface ownership. 1" = 2 miles. Quads are $2.00/sheet. County maps are $6.00/sheet.

U.S. GEOLOGICAL SURVEY (USGS)

Distribution Branch (Sales Office)
PO Box 25286
Denver Federal Center
Denver, CO 80225
(303) 202-4700
1-888-ASK-USGS

Topographic maps at scales of 1:24,000, 1:62,500, 1:100,000, 1:250,000, 1:500,000. Geology, hydrology, oil and gas maps at various scales and covering various areas. Indexes and price list available.

PUBLIC LANDS INFORMATION CENTER

6501 Fourth Steet NW
Suite I
Albuquerque, NM 87107
(505) 345-9498
www.publiclands.org (pick New Mexico)

Information about recreation and land use on all public lands in New Mexico, regardless of managing agency. The Public Lands Information Center offers all you need to know about visitor facilities, surrounding areas, appropriate maps and guides, and the rules and regulations for each area. If you need more information than you get from the site descriptions online at www.publiclands.org, check the bookstore, the link pages, or email the staff.
