Index to proceedings of the Forum on the Geology of Industrial Minerals

Compiled by George S. Austin and Gretchen K. Hoffman
THE FIRST THIRTY-ONE ANNUAL MEETINGS
OF THE FORUM ON THE GEOLOGY OF INDUSTRIAL MINERALS

1st 1965  Columbus, Ohio
2nd 1966  Bloomington, Indiana
3rd 1967  Lawrence, Kansas
4th 1968  Austin, Texas
5th 1969  Harrisburg, Pennsylvania
6th 1970  Ann Arbor, Michigan
7th 1971  Tampa, Florida
8th 1972  Iowa City, Iowa
9th 1973  Paducah, Kentucky
10th 1974  Columbus, Ohio
11th 1975  Kalispell, Montana
12th 1976  Atlanta, Georgia
13th 1977  Norman, Oklahoma
14th 1978  Albany, New York
15th 1979  Golden, Colorado
16th 1980  St. Louis, Missouri
17th 1981  Albuquerque, New Mexico
18th 1982  Bloomington, Indiana
19th 1983  Toronto, Ontario
20th 1984  Baltimore, Maryland
21st 1985  Tucson, Arizona
22nd 1986  Little, Rock, Arkansas
23rd 1987  North Aurora, Illinois
24th 1988  Greenville, South Carolina
25th 1989  Portland, Oregon
26th 1990  Charlottesville, Virginia
27th 1991  Banff, Alberta
28th 1992  Martinsburg, West Virginia
29th 1993  Long Beach, California
30th 1994  Halifax, Nova Scotia
31st 1995  El Paso, Texas

COVER—Map of the locations of the first 31 Forums and the sites of the 32nd (Laramie, Wyoming), 33rd (Quebec City, Quebec), 34th (Norman, Oklahoma), and 35th (Salt Lake City, Utah) are in parentheses.
Index to Proceedings of the Fourm on the Geology of Industrial Minerals

Compiled by George S. Austin and Gretchen K. Hoffman
New Mexico Bureau of Mines & Mineral Resources

SOCORRO 1996
NEW MEXICO INSTITUTE OF MINING & TECHNOLOGY
Daniel H. López, President

NEW MEXICO BUREAU OF MINES & MINERAL RESOURCES
Charles E. Chapin, Director and State Geologist

BOARD OF REGENTS
Ex Officio
Gary Johnson, Governor of New Mexico
Alan Morgan, Superintendent of Public Instruction

Appointed
Steve Torres, President 1991–1997, Albuquerque
Delilah A. Vega, Student Member, Secretary/Treasurer, 1995–1997, Socorro

BUREAU STAFF

BRUCE ALLEN, Field Geologist
BARRY ALLRED, Hydrogeologist
OREN J. ANDERSON, Senior Geologist
RUBEN ARCHULETA, Metallurgical Lab. Tech.
GEORGE S. AUSTIN, Senior Industrial Minerals Geologist
ALBERT BACA, Maintenance Carpenter II
JAMES M. BARBER, Assistant Director, Senior Industrial Minerals Geologist
Supervisor, Cartography Section
PAUL W. BA UER, Field Economic Geologist
LYNN A. BRANDWOOD, Senior Chemist
RON BROADHEAD, Assistant Director, Senior Petroleum Geologist
HED, Petroleum Section
RETA CASE, Administrative Secretary (Alt. Office)
STEVEN M. CATHER, Senior Field Economic Geologist
RICHARD CHAMBERLIN, Senior Field Economic Geologist
RICHARD R. CHAVEZ, Assistant, Head, Petroleum Section
SEAN CONNELL, Field Geologist
RUBEN A. CRESPEL, Garage Supervisor
VELLA DUNBAR, Analytical Chemist

RICHARD EISER, Lab. Technician
ROBBY W. EVANS, Mine Survey Engineer
NANCY S. GILSON, Assistant Editor
KATHRYN G. GIESNER, Manager, Cartography Section
DEBBIE GONZALEZ, Staff Secretary
IMAN A. GONSER, Metallurgical Geologist
WILLIAM C. HANSEN, Assistant Director, Engineering Geologist
BRUCE HARRIS, Petroleum Geologist
JOHN W. HAWLEY, Senior Environmental Geologist, Manager, Albuquerque Office
LYNNE HESSLER, Assistant Cartographer
MATT HESSLER, Geochronologist
LYNNE HEMENWAY, Geologic Info. Coordination Coordinator
CAROL A. HEILMANN, Associate Editor
GREGORY K. HOFFMAN, Senior Coal Geologist
PEGGY JOHNSON, Hydrogeologist
GLEN JONES, Manager, Digital Cartography Laboratory
PHILIP KYLE, Geochronologist/Petrologist
ANN LANG, Executive Secretary
THERESA L. LOPEZ, Receiptionist/Staff Secretary
DAVID W. LOWE, Senior Environmental Geologist

JANE A. CALVET LOVE, Editor
VIRGIL, LUSTY, Mineralogist/Economist Geologist
FRANK LUO, Petroleum Engineer
MARK MANSELL, GIS Technician
DAVE MCCOUBIE, Cartographer II
WILLIAM MCNEIL, Volcanologist/Geochronologist
CHRISTOPHER G. McKEE, X-ray Facility Manager
VIRGINIA T. MCLEMORE, Senior Economic Geologist
NORMAN J. MESTAS, Director of Publications Office
LISA PETERS, Lab. Technician
BARBARA R. FERGUSON, Biotechnologist
MARSHALL A. RITTER, Principal Senior Geophysicist
SANORA SWARTZ, Chemist, QA/QC Manager
TERRY TELLS, Information Specialist
REBECCA J. TITUS, Senior Cartographer
JUHY M. VALZA, Business Serv. Coordinator
MANUEL J. VASQUEZ, Meteoric II
SUSAN J. WELCH, Manager Geologic Extension Service
MICHAEL WHITMORE, Hydrologist
MAURER WELLS, Bibliographer
JIM ZIERER, Chief Editor/Senior Geologist

ROBERT A. BEEBE, Emeritus Sr. Petroleum Geologist
FRANK E. KOTTACKO, Emeritus Director/State Geologist
ROBERT H. WEBER, Emeritus Senior Geologist
SAMUEL THOMPSON III, Emeritus Sr. Petroleum Geologist
JACQUEL R. ROBERTS, Emeritus Senior Geologist

Research Associates

WILLIAM L. CHEMOSHEK, Grand Junction, CO
CHARLES A. FERGUSON, Linds. Alberta, CAN
JOHN W. GERSMAN, UMN
LILIAN H. GIL, Lab Chemist
CAROL A. HILL, Albuquerque
BOB JAMES, Albuquerque
SHARON L. KELLEY, NMT (Adjunct faculty)
WILLIAM L. KING, NMSU

BARRY S. KEEL, UNM
MICHAEL J. KEEN, USGS
TIMOTHY E. LAWTON, NMSU
DAVID V. LAURIE, UTEP
SPECKER G. LOGAN, NAMANHIS
TROY H. MACK, NMSU
NANCY J. MCMILLAN, NMSU
HOWARD B. MILLER, Carlsbad

Graduate Students

ROBERT APPLET
DAVID BENVY
GINA DORSA

MICHELE HETTINGER
NATHALIE LATREY
JASON LEE

JON STROUD
INGLIS WANG
JASON WHEE

Plus about 30 undergraduate assistants

Forward

Since the Forum on the Geology of Industrial Minerals was founded in 1965, it has met on an annual basis in 31 U.S. states and Canadian provinces. In 1995, the Forum has accepted bids to hold meetings in three additional states and one province (1996—Wyoming, 1997-Québec, 1998—Oklahoma, and 1999—Utah). Several other organizations have expressed interest in holding Forums, but they have yet to be accepted by the Business Meeting—the Forum’s ultimate authority. A Steering Committee, composed of the current meeting chairperson and three elected individuals representing three divisions of the profession (government, academia, and industry), serves as the function authority between Forums. The elected members of the Steering Committee serve staggered three-year terms. The immediately preceding and succeeding local chairs commonly attend a breakfast meeting of the Steering Committee during the Forum week, but have no official vote. In fact, the Steering Committee has no power to accept or reject bids, but only to recommend actions to the Business Meeting. That meeting is scheduled for the last time slot on the technical program during Forum week and before the annual banquet. The Business meeting is chaired by the local chairperson who also serves as the chairperson of the Steering Committee during the preceding year. Commonly the only business is to act on bids for forums and to elect a member of the Steering Committee, however a student scholarship was established by the 1995 Business Meeting.

The Index to the Proceedings of the first 25 forums, authored by Robert L. Bates, was published in 1990 by the Oregon Department of Geology and Mineral Industries. The present Index to the 26th through the 31st Forums, published by the New Mexico Bureau of Mines and Mineral Resources, is meant to update the reader on Forum literature for the last six years and is organized the same as the first index. To obtain copies of any proceedings, the reader is encouraged to use the last section in each index to contact the sponsoring agency or the author(s) of an article.

The passing of Robert L. Bates in 1994 and Marion Bates in 1995 left a void in the Forum on the Geology of Industrial Minerals. It was Bob, with Marion’s encouragement, who started the Forum in 1965. He oversaw its development from the beginning on a snowy morning in Columbus, Ohio, through the 30th Forum in Halifax, Nova Scotia, and attended every one. Bob was not present at the 31st Forum in El Paso, but Marion remained interested after his passing and sent financial support for the establishment of a scholarship to bring students to the Forum. In honor of Bob, the 1995 Business Meeting named it the “Robert L. Bates Student Scholarship.”

Bob was proud of saying that the Forum was not an organization but an "event." With his help, the Forum has matured into the premier annual industrial mineral "event" in North America.

George S. Austin and Gretchen K. Hoffman
January 1996

Industrial rock and mineral production in Virginia, Palmer C. Sweet ........................................ 1
Non-fuel mineral industry and products in southwest Virginia, James A. Lovett ............................ 9
Rezoning and permitting quarry sites, Alexander S. Glover, Jr ...................................................... 13
Every law creates an outlaw, Bobby J. Timmons ................................................................. 15
Computer application for reserve analysis and mine planning, H. Lyn Bourne and Anthony Bauer ................................................................. 19
The benefits of mining remain a well kept secret, Leonard J. Procter, Jr .................................... 41
Creating a good image, Joseph Andrews, Jr ............................................................................. 45
Importing construction aggregates to the continental United States, Mark J. Zdunczyk and Robert C. Walker ................................................................................................. 49
Sandstone aggregate resources in Scott County, Virginia, James A., Lovett ......................... 55
Virginia carbonate rocks and sampling project, William W. Whitlock and William F. Giannini 69
Brick production, combining art with science, Leon F. Williams, III ....................................... 75
Variations in rock physical properties as a result of enhanced cementation: An example from the Salem limestone (Mississippian) of south-central Indiana, Mark A. Brown and Donald D. Carr ................................................................. 77
Geologic factors affecting the underground limestone and dolomite mines of Indiana, Curtis H. Ault .................................................................................................................. 83
Patterns of fluorine distribution in Neogene phosphorite macrograins, Aurora district, North Carolina, Reynaldo Ong and Donald M. Davidson, Jr ......................................................... 95
Pegmatite investigations in Georgia, Mark D. Cocker ................................................................... 103
A re-evaluation of the taxonomy of Newark Supergrupo saurischian dinosaur tracks, using extensive statistical data from a recently exposed tracksite near Culpeper, Virginia, Robert E. Weems ............................................................................................................ 113
Geology of the kyanite deposits at Willis Mountain, Virginia, John D. Marr, Jr ................. 129
Karst associated mineral deposits in Virginia, David A. Hubbard, Jr ..................................... 135
Industrial silica resources in Virginia, Gerald P. Wilkes ............................................................ 139
Brucite marble occurrences along Ordovician Beekmantown dolomite and Eocene basalt and andesite dike contacts, Highland County, Virginia, Richard S. Good ....................................... 143
Geology, geochemistry and physical characterization of Minnesota clays, S. Hauck, J. Heine, L. Zanko, and T. Toth ................................................................. 153
Development and potential of bedrock aggregate resources of Newfoundland, Dan Bragg ................................................................. 173
West Virginia's nonfuel mineral resources, Claudette M. Simard ............................................. 177

Abstracts

The role of the U.S. Bureau of Mines in the development and regulations of industrial minerals, A. F. Barsotti ........................................................................................................ 185
Overview of Department of Mines, Minerals and Energy regulatory program for metal/nonmetal nomenclature, R. E. Morgan and G. E. Barney ......................................................... 185
North Carolina industrial minerals: commodities, applied mineral research, regulation, and resources to assist mineral development, J. C. Reid ................................................................. 185
U.S. Geological Survey's mineral resource data system, R. E. Arndt ........................................ 186
Developments and opportunities in industrial carbonates on Newfoundland's Great Northern Peninsula, A. F. Howse ............................................................. 186
Dimension stone in Newfoundland, J. R. Meyer .................................................................. 187

Canadian industrial mineral exports: A global contribution, Michel Prud'homme .................. 1
Industrial minerals in Alberta, Wylie N. Hamilton ................................................................. 9
Overview of industrial minerals in Saskatchewan, Paul Guliov ............................................ 19
Abstracts

Geological setting and development and potential of selected industrial minerals in southeastern British Columbia, Stephen B. Butrenchuk ........................................ 37

Geological history of the Western Canada Sedimentary Basin, Grant D. Mossop ........................................ 45

An overview of the Saskatchewan potash industry, Keith S. Crosby ........................................ 47

Regional geology of the Mount Brussilof carbonate-hosted magnesite deposit, southeastern British Columbia, Canada, George J. Simandl, Kirk D. Hancock, Dan Z. Hora, Mary E. MacLean, and Suzanne Paradis ........................................ 57

Environmental significance of magnesium oxide as an industrial mineral, Tim Sears and Hagen Schultes ........................................ 67

MAGCAN and magnesium, A. H. Wheeler ........................................ 71

Barite and its uses as a filler and extender, Ronald J. Singh ........................................ 75

Geology of talc and chlorite deposits in Montana, Richard B. Berg ........................................ 81

The Lang Bay kaolin resource, British Columbia, Lauch Farris and Colin C. Harvey ........................................ 93

Opportunities for high value-added papermaking mineral pigments in western North America, George Ionides is Auger ........................................ 111

The geology of sands and gravels in the Bow Valley corridor, Alberta, W. A. Dixon Edwards ........................................ 103

The Upper Devonian Palliser Formation in the type area near Exshaw, Alberta, N. C. Meijer Drees and D. I. Johnson ........................................ 109

The Bearberry Ultra Sour Gas Project, Paul Kitzan and Louis Auger ........................................ 111

Yttrium enriched phosphorites in the Fernie Basin, southeastern British Columbia, Jennifer Pell ........................................ 117

Evaluation of the Fernie phosphorite and Princeton zeolites: potential for rock phosphate zeolite fertilizer use, Virginia Marcille-Kerslake ........................................ 125

A massive skarn-hosted andradite deposit near Penticton, British Columbia, H. C. Grond, R. Wolfe, J. H. Montgomery, and G. H. Giroux ........................................ 131

Geology, mineralogy and processing of Mount Riordan garnet ores, G. I. Mathieu, M. R. Boisclair, and R. Wolfe ........................................ 135

Diamonds in Saskatchewan, Malcolm Richard Gent ........................................ 147

Water filtration using perlite from the Frenier deposit of British Columbia, R. D. Giles and G. W. Poling ........................................ 159

Rocks in motion, Donald F. Gunning ........................................ 167

Ammonite, an organic gemstone from Alberta, Rene Vandeserve ........................................ 171

Four marl deposits within the Skeena River Valley, northwestern British Columbia (103I/16W, 103P/1W, 93M/5E), M. L. Malott ........................................ 173

1992 Forum on the Geology of Industrial Minerals, West Virginia, Claudette M. Simard ........................................ 179

Geological setting and development and potential of selected industrial minerals in southeastern British Columbia, Stephen B. Butrenchuk

The geologic and economic potential for shallow underground limestone and dolomite mines in Indiana, Curtis H. Ault ................................................................. 1

The building stone industry of the southwestern United States, George S. Austin and James M. Barker .......................................................... 9

Overview of industrial mineral transport, James M. Barker and George S. Austin ................................. 19

Overview of the industrial minerals industries: Status and issues, Aldo F. Barsotti ......................... 33

Microcrystalline silica (tripoli) deposits in southernmost Illinois, Richard B. Berg and John M. Masters .................. 43

Application of X-ray diffraction and visible-near infrared spectroscopy in talc exploration, A. M. Blount, Richard G. Lathrop, and Gary A. Parkison ........................................... 50

Utilization and approval of materials in the Huntington District, U.S. Army Corps of Engineers, H. Steven Brewer and Robert E. Yost, Jr ................................. 56

Roles of organic carbon, sulfur, and iron to produce color variation in Indiana Limestone, Mark A. Brown, Donald D. Carr, and Margaret V. Ennis ................................. 59

Age and origin of heavy-mineral deposits in the upper Coastal Plain of North Carolina and Virginia, Robert H. Carpenter and Charles W. Hoffman ......................... 71

Southern peat deposits: Geology and utilization, Otis M. Clarke, Jr. .................................................. 81

Geological setting and geochemical trends in the Jasper County pegmatite district, Georgia, Mark D. Cocker .......................................................... 85

Industrial minerals of Vermont: 200 years and going strong, Diane L. Conrad and Diane M. Vaneeck .......................................................... 95

The role of industrial minerals in controlling SO2 emissions from coal-fired plants in Kentucky, Garland R. Dever, Jr .......................................................... 103

Regional and economic geology of the York Valley, Pennsylvania, G. Robert Ganis and David A. Hopkins .......................................................... 108

A business-education partnership success story, Alexander S. Glover .................................................. 114

Defining industrial mineral reserves: Common and subtle problems, David A. Holmes and David M. Abbott, Jr. .......................................................... 116

Quarry investigations: One method of quality assurance, John G. Jarvis ............................................. 124

Aggregates markets of the U.S. eastern seaboard, Richard Poulin and Oliver Vagt .......................................................... 139

Cancer concerns and the industrial mineral industries—Real or perceived?, F. A. Renninger .......................................................... 146

The effect of regulations on asbestos and other designated mineral carcinogens on the vitality of the industrial minerals industries, Malcolm Ross ................................... 149

Coproduction of industrial minerals: One person's overburden is another's product, Nelson R. Shaffer and Kathryn R. Shaffer .......................................................... 152

Industrial mineral production in the southeastern United States—How does it compare with the rest of the nation? Steve W. Sikich .......................................................... 161

Crystalline graphite deposits, classification and economic potential in the Lachute-Hull-Mont Laurier area, Quebec, George J. Simandl, Susanne Paradis, Guy Aliquette, and Henri-Louis Jacob .......................................................... 167

West Virginia's industrial mineral resources and producers, Claudette M. Simard .......................................................... 175

Industrial minerals in Ohio—Production trends and multi-production operations, David A. Stith and Sherry L. Weisgarber .......................................................... 182

Pond screenings from aggregate plants: An industrial minerals resource, Steven J. Stokowski 187

Limestone selection for SO2 emission reduction from coal-fired power plants, Palmer C. Sweet, William F. Giannini, William Whitlock, and Jeffrey L. Horton .......................................................... 192

Synthetic aggregate: A new answer to an old problem?, Doss H. White .......................................................... 203

Abstracts

Plans for the 1993 Forum in California—The 29th Forum on the Geology of Industrial Minerals, D. J. Beeby .......................................................... 205

A sampler of Pennsylvania's carbonate sorbents, S. W. Berkheiser, Jr., and R. C. Smith, II .......................................................... 206

Industrial mineral opportunities on national forests throughout the U.S., T. K. Collins .......................................................... 207

West Virginia's climate for business development, D. D. Davis .......................................................... 208

Use of geochemical surveys in Ti-Hf-REE-Th-U placer exploration: A Mid-Atlantic-States example, A. E. Grosz .......................................................... 209
(The first number refers to the starting page of the article in the proceedings; the second number is the page of the proceedings in which the abstract from the program is reprinted.)

GENERAL TOPICS
Communication in diversity, Robert L. Bates .................................................. 1, 316
Biotechnology and industrial minerals, Nelson R. Shaffer .................................. 5, 337
Intravenous geology, Bobby J. Timmons............................................................... 17, 342
Flake graphite and zeolite research provides potential solution to domestic problems, L. J. Nicks, L. E. Schultze, and E. G. Valdez .................................................. 21

EASTERN UNITED STATES
Waste material resources in Virginia, Palmer C. Sweet ........................................ 29, 340

WESTERN UNITED STATES
Production and marketing of perlite from the western United States, George S. Austin and James M. Barker ................................................................. 39
Geology of western U.S. talc deposits, Richard B. Berg ........................................ 69, 317
1992 Industrial mineral production in California and Nevada, Fred V. Carrillo ........ 81, 319
Limestones of New Mexico and adjoining areas suitable for sulfur removal in coal-fired power plants, Frank E. Kottlowski and Augustus K. Armstrong ......................... 87, 328

CALIFORNIA
Mineral land classification in California, Ralph Loyd, Robert Hill, and Russell Miller ........ 101, 330
California Mineral Education Foundation Conference model: Changing public perception of the mineral industries, Greg R. Wheeler ............................................. 113, 344
Pumice for stone-washed and acid-washed textiles: Benton Pumice beds, Mono County, California, Gregg Wilkerson and Jerry Hoffer ........................................... 119, 345
Geology, genesis, and mining of high brightness, high purity limestone deposits in the San Bernardino Mountains and Mojave Desert area of southern California, Howard Brown . . . 123, 318
Geology, and processing facility, CalMat Co. Reliance Plant, Irwindale, California, Edward D. Elkins and Thomas E. Wiegert .................................................. 137, 320
The Soledad Canyon ilmenite mine (P. W. Gillibrand Co.) San Gabriel Mountains, southern California, John C. Heter .................................................. 145
Diatomaceous earth operation, Grefco, Inc., Lompoc, California, David Jenkins .......... 155
The geology and economic development of Searles Lake, Gail Moulton and Ken Santini . . . 161, 332
Geology and mining of gypsum from the Miocene Fish Creek gypsum in Imperial County, California, Roger D. Sharpe and Greg G. Cork .................................................. 169, 338
The Boron open-pit mine at the Kramer borate deposit, Joe W. Siefke ..................... 181, 338
Geology of the Hector Mine deposit, R. D. Willette ........................................ 189, 345
The Mojave Desert Province, southern California: Geologic overview, M. O. Woodburne . . . . 195, 346

OREGON
Brine mineral occurrence in the Diablo Mountain (BLM) study area, and its possible significance to Pacific Rim trade, Thomas J. Peters, Dennis S. Kostick, and Michael E Diggles ............................................................ 223

CANADA
Wollastonite in Quebec Province, Canada, Claude Hebert and Henri-Louis Jacob ........... 245, 322
Diamonds in Canada: An overview of current developments, Robert Irvine and M. Boucher . 253
Canada’s zero effluent potash mine, Brian V. Roulston ........................................ 261, 336

MEXICO
Mexico: Opportunities in industrial minerals, Armando Alatorre, Peter Harben, Hal McVey, and Ken Santini ........................................................................................................ 269

Abstracts
Geology and potential of industrial minerals in Mexico, A. Alatorre and K. Santini ........ 313
A communications gap—A breakdown in efficiency and its costs to user, producer, and explorationist, T. P. Anderson ................................................................. 314
Gem-mineral production in the United States, G. T. Austin ........................................ 315
Geology, production, and marketing of perlite from the western United States, G. S. Austin and J. M. Barker ................................................................. 316
Solution recovery of phosphate from deep wells in Alberta, J. R. Century ................. 319
Geochemical and geophysical surveys in Tri-Hf-REE-Th-U placer exploration, A. E. Grosz, P. G. Schruben, and C. L. Smith ........................................ 321
Mexico—Markets and opportunities for industrial minerals, P. Harben and H. McVey ........ 322
Characterization of kaolin resources in Minnesota, J. J. Heine .................................. 323
Global depletion and demand of bioessential agrominerals—Phosphate rock as an example and its impact on global food supply, J. R. Herring and R. J. Fantel .......... 324
How geologic reinterpretation and new recovery methods repeatedly expanded the mineral reserves and mining life of the Searles Lake evaporite deposit, San Bernardino County, California, D. A. Holmes ........................................ 325
The Mud Hills clinoptilolite deposit as a source of ion exchange materials for nuclear waste treatment, D. A. Holmes ................................................................. 326
Industrial minerals in British Columbia—An overview, Z. D. Hora ......................... 326
Barite mineralization, alteration and geochemistry of the Waterman mine, San Bernardino County, California, M. C. Ireland and D. R. Jessey ................. 327
Diamonds in Canada: An overview of current developments, R. D. Irvine, M. Boucher, and D. Cranstone ................................................................. 327
Geology, mining and processing of Alberhill district sedimentary fireclays and residual clay and shales, J. W. Kirk ................................................................. 328
Remote sensing and geophysical techniques for locating and assessing potential sources of aggregate, W. H. Langer and D. H. Knepper, Jr. ........................................ 329
Mineral land classification in California, R. Loyd and R. Hill .................................. 330
California industrial minerals—A potential source of valuable commodities, G. M. Martinez . 330
Mineral and energy resources in the Salton Trough, California, M. A. McKibben .......... 331
Geology and mining of Idaho phosphate, S. W. Moore ........................................ 332
Reclamation compliance in California, D. J. O’Bryant ........................................ 333
Can local development of industrial minerals under the restraint of more environmental regulation, compete in the new international market?, R. D. Peel ........................................ 333
Brine mineral occurrence in the Diablo Mountain (BLM) study area, and its possible significance to Pacific Rim trade, T. J. Peters ........................................ 334
Mined-land reclamation in California, J. S. Pompy ........................................... 335
Laboratory investigations prior to start-up of Vulcan’s frac sand plant, Voca, Texas, S. J.
Stokowski ................................................................. 339
Genesis of barite deposits in the central Mojave Desert, San Bernardino County, California,
D. R. Tarman, D. R. Jessey, and K. B. Rosso ........................................... 341
Flake graphite and zeolite research provides potential solution to domestic problems, E. G.
Valdez ................................................................. 342
Geology and physical properties of some active and potential sources of industrial and pet
waste absorbents in the United States, L. M. Vredenburgh and G. Wilkerson .................. 343
Paleo molasses—The forgotten industrial mineral, D. H. White .................................. 344
How special are specialty sands?, M. J. Zdunczyk ............................................. 346

Department of Natural Resources and Energy, Minerals and Energy Division, Miscellaneous

31st Forum on the Geology of Industrial Minerals—The North American organization for
industrial minerals, George S. Austin ................................................................. 1
Geology of the Forum, R. L. Bates ................................................................. 17
Point Aconi Generating Station Cold Water Intake Tunnel, Foundation-Harry Vie joint ven-
ture, Kevin Beaton ................................................................. 9
Limestone to gypsum, A. Buzas and M. Legere .................................................. 27
The Pugwash salt deposit, Pugwash, Nova Scotia, Canada: Geology and tectonic implications,
D. C. Carter ................................................................. 43
Products supplied from crushing and screening operations at Little Narrows Gypsum, John
A. Fitzgerald ................................................................. 48
Industrial mineral development in New Brunswick and Nova Scotia, Canada, J. H. Fowler
and T. C. Webb ................................................................. 55
Overview of humate production in North America, Gretchen K. Hoffman, James M. Barker,
and George S. Austin ................................................................. 71
Newly documented occurrences of kyanite and related minerals in western Newfoundland,
Ambrose F. Howse ................................................................. 82
Industrial minerals and the environment: A North American perspective, Robert D. Irvine,
Aldo F. Barsotti ................................................................. 99
Natural aggregate—geologic opportunities, William H. Langer .................................. 121
Ingenuity in reclamation, G. M. Langford ..................................................... 134
Limestone in Nova Scotia—Green Gold, R. H. MacDonald, R. C. Boehner ................. 141
Industrial minerals—environmental assessment—public perception, D. W. MacKenna ...... 152
Benefits and hazards of salt-dome utilization, J. D. Martinez .................................... 171
Operations at the National Gypsum (Canada) Ltd., East Milford Quarry, Nova Scotia, J. H.
McCubbin ................................................................. 180
Aggregate deliveries—the hard way, R. A. Murray ............................................... 194
The Shubenacadenic Project—A public consultation process model, J. R. O’Hagan ........ 206
The Sydney Tar Ponds clean-up project, E. B. Parsons ........................................ 214
Stratigraphy and depositional synthesis of middle to late Viséan evaporates in part of the
Moncton Subbasin, New Brunswick, Canada, B. V. Roulston, T. C. Webb, and M. E.
Monahan ................................................................. 225
Geological setting of industrial mineral deposits in the Maritime Provinces of eastern Canada,
R. J. Ryan ................................................................. 234
Some of Virginia’s imported and exported mineral commodities and products, Palmer C.
Sweet ................................................................. 240
The peat industry of Atlantic Canada, J. J. Thibault and Jean-Yves Daigle .................... 241
Research related to the agricultural use of gypsum, P. R. Warman and T. R. Munro-Warman
Aggregate extraction and rehabilitation in the Brampton Esker area of Ontario, S. E. Yunid . 255

Abstracts

The use of analytical electron microscopy and microprobe analysis in geology and materials
science, G. N. Bance, C. S. Belfry, and J. C. White ........................................ 240
Determination of compliance with OSHA’s final rule on asbestos and ATA minerals: A joint
responsibility of the geologist on site and the mineralogist in the laboratory, A. M. Blount 241
Mining is part of our heritage, O. M. Clarke, Jr ........................................... 243
The sand and gravel resource potential of Northumberland Strait, Gulf of St. Lawrence, G. B.  
J. Fader and S. S. Pecore ........................................ 244
British Columbia industrial minerals and their markets, Z. D. Hora ........................................ 246
Natural aggregate—Building America’s future, W. H. Langer ........................................ 247
High-calcium limestone prospect in Thebes gap, southernmost Illinois, A. W. Mitchell, and J.  
M. Masters .................................................. 252
British Columbia industrial mineral deposit models, G. J. Simandl, Z. D. Hora, and D. V.  
Lefebure .................................................. 254
Vein graphite, central New England, USA, S. J. Stokowski, Jr. ........................................... 255
Locating subsurface crystalline rock masses for aggregates using geophysical techniques in  
Monroe region, New Brunswick, D. V. Venugopal, H. H. Hassan, and K. B. S. Burke .............. 257
Brief geology and history of Demioiselle gypsum quarry, southeastern New Brunswick,  
Canada, K. D. A. Whaley ..................................... 260

KEYNOTE ARTICLE

Industrial minerals and rocks of the tri-state border region—West Texas, southern New  
Mexico, and northern Chihuahua, K. F. Clark ................................................................. 7

MEXICO

Overview of celestite deposits of south central Coahuila, Mexico—Geology and exploitation,  
A. Rodriguez Garza and W. N. McAnulty, Jr. .............................................................. 27
Economic exploitation of the Cretaceous Lagrimas Formation for production of portland  
cement, Ciudad Juarez, Chihuahua, Mexico, G. Garcia .................................................. 33

TEXAS

Brucite deposit in Marble Canyon, Culberson County, Texas, T. E. Newman and G. K.  
Hoffman .................................................. 37
Texas—Industrial minerals, imports, and exports, P. C. Sweet ........................................ 43

NEW MEXICO

Overview of the Carlsbad Potash District, New Mexico, J. M. Barker and G. S. Austin .......... 49
Modern New Mexico adobe: A response to some environmental concerns, G. S. Austin and M.  
R. Goosby .................................................. 63
Travertine in New Mexico: Commercial deposits and otherwise, J. M. Barker, G. S. Austin,  
and D. J. Sivils .................................................. 75
Limestones of New Mexico and adjoining areas suitable for sulfur removal in coal-fired  
powerplants, F. E. Kottlowski and A. K. Armstrong* .................................................... 93
Geology and chemistry of humate deposits in the southern San Juan Basin, New Mexico, G.  
K. Hoffman, J. Verploegh, and J. M. Barker* .......................................................... 105
Economic geology of the St. Cloud Mining Company (Cuchillo Negro) clinoptilolite deposit,  
Sierra County, New Mexico, J. L. White, W. X. Chavez, Jr., and J. M. Barker ............. 113
Industrial specifications of the Wind Mountain nepheline-syenite deposit, Cornudas  
Mountains, Otero County, New Mexico, V. T. McLemore and J. R. Guilinger* ................. 121
Geology, mineral resources, and marketing of the Wind Mountain nepheline-syenite  
porphyry, Cornudas Mountains, New Mexico and Texas, V. T. McLemore, V. W. Lueth, J. R.  
Guilinger, and T. C. Pease .................................................. 127
Garnet resource potential in southern New Mexico, V. W. Lueth .................................... 137
Recovery of garnet from Hanover mine tailings, Grant County, New Mexico, USA, U. Cetin, I.F.  
Walder, V. W. Lueth, and I. H. Gundiler .................................................. 147
Franklin Industrial Minerals—Mica plant operations in New Mexico, G. L. Nelson* ............ 159
Economic geology of perlite in New Mexico, J. M. Barker, R. M. Chamberlin, G. S. Austin, and  
D. A. Jenkins* .................................................. 165
Genetic aspects of commercial perlite deposits in New Mexico, R. M. Chamberlin and J. M.  
Barker .................................................. 171

OTHER STATES

Natural clinker—The red dog of aggregates in the Southwest, G. K. Hoffman ........................ 187
Advances in the understanding of the industrial mineral resources of the state of Georgia, M  
D. Cocker and B. J. O’Connor ............................................................. 197
Background stream-sediment geochemistry and hydrochemistry of a major river basin in Georgia: Use in industrial-mineral-resource and environmental studies, M. D. Cocker 207

Heavy minerals in fine-grained waste materials from sand and gravel plants of Indiana, N. R. Shaffer 215

Geology of resources for crushed-stone aggregate in Arkansas, S. W. Kline 223

**INTERNATIONAL**

Industrial minerals south of the Mexican border, P. W. Harben 231

Hydrothermal and residual kaolin deposits of Chile, A. Gajardo 245

Economic geology of Cretaceous deposits in Nova Scotia, K. A. MacLeod 253

The Mount Gelai hectorite deposits, Arusha District, Tanzania, East Africa, T. H. Eyde 257

**GENERAL TOPICS**

Cat litter: A growing market for industrial minerals, G. S. Austin and C. Mojtabai 267

Domestic pumice and garment wet-processing, J. M. Hoffer 275

Brick tunnel-kiln thermal-energy inputs, G. F. Cudahy and G. S. Austin 283

Value added—Refractory dolomite, a case study, D. A. Hopkins 291

Industrial minerals operations—Tying ISO 9000 to geology and reserve management, D. A. Holmes 293

Spreading the word about geology through teacher workshops, C. M. Simard 301

**Abstracts**

Geology and industrial minerals of northeastern Mexico, A. E. Alatorre, A. Colin, and K. Santini 305

Application of real-time field mapping systems to enhance data gathering and productivity in the mining industry, G. S. Dymesich and B. A. Hillman 309

The 32nd Annual Forum on the Geology of Industrial Minerals—Laramie, Wyoming, R. E. Harris 311

Quantitative XRD—The minerals make the difference, R. E. Hughes and D. M. Moore 313

The Amarillo Texas silica deposit, Texas, L. W. Krumrey 314

A comparison of geology and industrial uses of pumice deposits in the Jemez Mountains, New Mexico, M. A. Linden and D. N. Tafoya 316

Alerces: An economic development opportunity—Exploitation of high-quality industrial minerals, R. Martinez, J. Perez, and M. Martinez 318

Some observations on the origin of bentonites, I. E. Odom 321

The industrial minerals of the Sultanate of Oman, R. F. Riordan and J. F. Pasquet 322

High-calcium-limestone occurrences and industry in Utah, B. T. Tripp 323

AUTHORS

Numbers in bold face refer to Proceedings volume number.

Abbott, D. M., Jr., see Holmes, D. A.
Alatorre, A. E., and Santini, K. 29, 313
Alatorre, A. E., Harben, P., McVey, H., and Santini, K. 29, 269-312
Aliquette, G. see Simandl, G. J.
Anderson, T. P. 29, 314
Anderson, W. see Hughes, R. E.
Andrews, J., Jr., 26, 45-47
Appiah, H. see Brown, M. A.
Armstrong, A. K. see Kottlowski, F. E.
Arnold, K. E. see Kottlowski, F. E.
Asher, J. Z. 27, 273-275
Asher, J. Z. see Giroux, G. H.
Barker, J. M., Austin, G. S., and Barker, J. M. 28, 245, 317
Barker, J. M., Austin, G. S., and Moorjani, S. 30, 245
Boehner, R. C. see MacDonald, R. H.
Boisclair, M. R. see Mathieu, G. I.
Boucher, M. see Irvine, R. D.
Bourne, H. L., and Bauer, A. M. 26, 19-40
Bragg, D. 26, 173-176
Braic, D. see Meyer, J.
Brewster, H. S., and Yost, R. E., Jr., 28, 56-58
Brown, H. 29, 123-136, 318
Brown, M. A., Carr, D. D., and Ennis, M. V. 28, 59-64
Burke, K. B. S. see Venugopal, D. B.
Butnreich, S. B. 27, 37-43
Chao, D. see Ennis, M. A.
Carr, D. D. see Brown, M. A.
Carrillo, F. see Thibault, J. J.
Carr, D. see Ennis, M. A.
Carpenter, R. H., and Hoffman, C. W. 28, 77-95
Chamberlin, R. M. see Venugopal, D. B.
Chamberlin, R. M., and Barker, J. M. 28, 171-185
Chamberlin, R. M. see Barker, J. M. 31, 317-185
Chao, D. see Ennis, M. A.
Chao, D. see Ennis, M. A.
Clark, K. F. 37-26
Clarke, T. A., and Alatorre, A. E.
Collins, T. K. 28, 207
Dagge, J. Y. see Thibault, J. J.
Davidson, D. M., Jr., see Hong, R. Dave, D. D. 28, 208
Dean, P. see Meyer, J.
Dever, G. R., Jr., 28, 103-107 Dever, G. R., Jr., see Hughes, R. E.
Dynesich, G. S., and Hillman, B. A. 31, 309-310
Edwards, W. A. D. 27, 103-107
Eidel, J. J. see Hughes, R. E.
Elkins, E. D., and Wiegert, T. E. 29, 137-144, 320
Ennis, M. V. see Brown, M. A.
Eyde, T. H. 29, 257-266
Faer, G. B. J., and Pecore, S. 30, 244
Fante, R. J. see Herrying, J. R.
Farnsworth, K. B. see Hughes, R. E.
Farris, L., and Harvey, C. C. 27, 93-97
Filides, B. see Hamilton, W. N.
Fischl, P. 27, 186, 198
Fitzgerald, J. A. 30, 43-47
Fuk, L. see Blacic, J.
Fowler, J. H., and Webb, T. C. 29, 241-243, 320, 30, 48-54
Gajardo, A. 31, 245-251
Ganis, G. R., and Hopkins, D. A. 28, 108-113
Gantenbein, M. 29, 321
Garica, G. 31, 33-36
Gardner, C. H. see Carpenter, P. A., III
Garza, A. R., and McAnulty, W. N., Jr., 27-32
Gent, M. R. 27, 147-157
Giannini, W. F. see Whitlock, W. W.
Giannini, W. F. see Sweet, P. C.
Giles, R. D., and Poling, G. W. 27, 159-166
Giroux, G. H. see Grond, H. C.
Gleeson, C. F. see Rampton, V. N.
Glover, A. S. 28, 114-115
Glover, A. S., Jr., 26, 13
Good, R. S. 26, 143-151
Goolsby, M. A. see Austin, G. S.
Grond, H. C., Wolfe, R., Montgomery, J. H., and Giroux, G. H. 27, 131-133
Grosz, A. E. 28, 209
Grosz, A. E., Schruben, P. G., and Smith, C. L. 29, 321
Guilinger, J. R. see McLemore, V. T.
Guilov, P. 27, 19-35
Gundin, I. H. see Cetin, U.
Gunning, D. F. 27, 167-169
Harmon, W. N. 27, 9-17
Harmon, W. N., and Hora, Z. D. 26, 187
Harmon, W. N., Price, M., Chao, D., Fildes, B., and Lutz, J. 27, 183
Hancock, K. D. 27, 193-201
Hancock, K. D. see Simandl, G. J.
Harben, P. W. 31, 231-244
Harben, P. W., and McVey, H. 29, 322 Harben, P. W. see Alatorre, A.
Harries-Rees, K. J. 28, 210
Harris, R. E. 31, 311-312
Harvey, C. C. see Farris, L.
Hassan, H. H. see Venugopal, D. B.
Hays, J. M., and Miller, W. H. 28, 211
Hays, J. M., see Hughes, R. E.
Hauck, S., Heine, J., Zanko, L., and Toth, T. 26, 153-171
Hebert, C. J., and Jacobs, H. -L. 28, 212, 29, 245-251, 322
Heine, J. J. 29, 323
Heine, J. J. see Hauck, S.
Meeting sites and sponsoring agencies

1. Columbus, 1965. Department of Geology, Ohio State University, 125 South Oval Mall, Columbus, OH 43210
