Suitability for Managed Aquifer Recharge via Shallow-based Methods

June, 2019

by

Daniel J. Koning, Colin T. Cikoski,
and Andy F. Jochems

New Mexico Bureau of Geology and Mineral Resources

A Research Report of New Mexico Tech

Legend

Water table
- Groundwater contour (ft above sea level)

Geology
- Generalized interfingering contact
- Fault

Contamination and floodplain buffers
- Uncutline (exclusion buffers)

Unsaturated zone suitability ratings
- Low suitability (0.64 - 1.23)
- Moderate suitability (1.23 - 1.38)
- High suitability (1.38 - 1.51)
